Attachment 1

OPERATIONS COORDINATING BOARD
Washington 25, D.C.

November 16, 1956

MEMORANDUM FOR: Chairman, Technical Panel for International Broadcasting
(TPIB)

FROM: Chairman, Committee on Broadcasting and Television (COBAT)

SUBJECT: Experimentation for Trans-Atlantic TV Broadcast

COBAT is interested in the possibility of West to East trans-Atlantic television, and understands that the Derveaux-Telecom system offers some possibility of bringing this about.

Since Telecom, Inc. has requested some financial assistance for further experimentation, COBAT would greatly appreciate an engineering opinion concerning the method proposed, and the advisability of the investment of perhaps \$20,000 for further experiments and demonstrations. Mr. Martin has pertinent correspondence.
